KENNY PIZZETTI – HIGHWAY SUPERINTENDANT – ROAD PAVING UPDATE/DISCUSSION:

Mr. Pizzetti stated the pavement plan is done every two years as part of a twenty-year layout plan. The study considers the top of the road, bottom of the road, and traffic. The study is based upon a one-million-dollar budget. The Town of Webster funds only half of that. Traffic through Webster has picked up. The town also picks up some of the small roads and paves them inhouse. Webster has larger road width compared to other towns. Chairman Becker asked if the \$12.5-million backlog would be reduced with projects that have been completed such as Lake Parkway. Mr. Pizzetti stated the amount will go down as the projects are "knocked off" the list. He stated Granite Street, Nelson Street, Whitcomb Street and Lincoln Street have all been addressed. Selectman Jolda asked what the difference was between the tack coat and the bit overlay. Mr. Pizzetti stated the tack coat is an emulsion type of product that goes on the road. Tack coat goes on before paving. He stated they lost three weeks of paving in July due to weather. He stated they are trying to catch-up and complete the projects for 2021. Chairman Becker asked if there were additional funding sources for paving, such as CDBG funding. Mr. Willardson stated that CDBG funds can be used for paving. He stated Granite Street is currently being

funded by those funds. Selectman Gabor asked where sidewalks were in the equation. Mr. Pizzetti stated sidewalks do not generally fall into this plan.
